Benefits...

Individual Data Portability & Availability	Data Safety & Security	100% Data Validity
Eliminates Health Insurance Claims Fraud	Ensures Maritime Employee Credibility	Facilitates GDPR Compliance

...and more

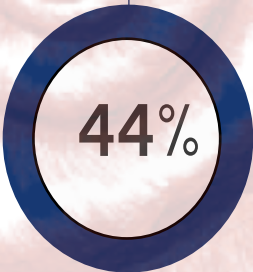

The Problem in Numbers

Statistics indicate a steady increase in the Cost of Illness related claims over the past 10 years !	NOW seeing a sharp increase in frequency !	illness Claims category must be closely monitored going forward !
--	--	---

Serious crew member illness can cause a number of issues such as delays in vessels scheduled arrivals, with further delays in ports & challenges involving crew replacement, all of which cost money !

The frequency and cost for **claims more than USD 5,000 is rapidly increasing.**

Cardiovascular disease is presented as the leading cause of illness related claims **reflecting 44% of the total illness claim costs.**

Crew member cardiovascular disease case studies indicate a pre-existing medical condition; **noting that the crew member had presented a valid health certificate prior to embarkation.**

Cardiovascular disease is considerably **more costly** than any other category for all types of vessels and also reports the **highest frequency.**
