### user friendly

It can be used by anyone. It can be utilized by any health professional!

## my-VIOS & VIOS mind a powerful ecosystem

We live in world full of danger, that is why we try to keep safe everything we hold dear, but that does not extent to our health data. According to statistics people usually tend to disregard the importance of their health data when they are healthy. But when the time comes and the need to concentrate health data in one place arises, one will realize that it is a difficult or even impossible task.

**my-VIOS** was created to meet the need of the person to collect and review, at any given time, their data and protect their own life.

**my-VIOS** is someone's life, as life would be if it were only data and images, stored solely on one point of reference and controlled completely by the person themselves.
