

my VIOS

for Insurance Companies

a new way to deliver services

my - VIOS special edition for insurance companies with fingerprint recognition

An ID for every
Beneficiary

A Unique Point
of Reference

A complete
medical file
for every patient

The challenge in managing health services within insurance companies is to make sure that those who receive them, are actually the ones who really deserve them (insured). At the same time, more and more insurance companies try to be more competitive, in order to keep their clients happy and secure new ones.

my - VIOS is here to:

- **ensure** the delivery of health services through a controlled process
- **offer** new services to the insured
- **upgrade** health services
